To whom it may concern,

Paragon Personnel has provided the Alstom UK Retrofit Team (via Alstom S&E (Pty) Ltd) with engineering staff for the project located at Eskom Nuclear Power Station.

The requirements for staff provided on a contract basis were stringent and Paragon has continuously provided suitable and highly qualified candidates, who have performed very well to date.

We accordingly can recommend Paragon Personnel as a professional recruitment company, especially for contract staff, and we have been satisfied with their services and will consider Paragon for our future projects as a preferred supplier of suitable and qualified staff.

In the event that further information is required, the writer will gladly supply some.

As I will be leaving for another project in Australia this month, please contact me on my international mobile number shown below.

Yours sincerely,

Peter Currell

Alstom Retrofit Site Manager
